Curb Mount Twin Wall Polycarbonate Skylights

The Curb Mount Twin Wall Polycarbonate skylight accompanied with the Retro Fit Metal Roof Flashing will give your roof a clean and finished appearance.

The Twin Wall Polycarbonate is UV resistant, durable, and light weight, making this one of the preferred skylight materials on the market for metal roof structures.

Unlike the single wall fiberglass and thin polycarbonate lighting panels, the Twin Wall Polycarbonate sheet traps air between the two layers forming an insulating factor, thus being more energy efficient than the rest.

***Please note that the Curb Mount Twin Wall skylight is not recommend for flat roof applications.**

Curb Mount Double Dome Skylights

The Curb Mount double dome skylight is one of the best skylights on the market for flat roof applications. These skylights are manufactured in standard or impact resistant acrylic.

Sizes available:

24" x 24" up to 24" x 96"

Available Colors:

Bronze/Clear Clear/Clear White/Clear

Retro Fit Metal Roof Skylight Flashings

The pre-made Retro Fit Metal Roof Skylight Flashings from Solar Accessories are designed to save the customer time and labor.

These easy to install aluminum skylight flashings are constructed using .063 aluminum and can be formed to just about any style metal roofs from residential 3/4" ribs to the tall commercial ribs. The Retro Fit Metal Roof Skylight flashings are designed to meet building code regulations for curb heights extending from the roof line to the top of the curb.

(Check your building codes before ordering)

***No more lost time and labor
constructing wood curbs.***

- .063 welded aluminum structure
- Curb heights up to 12" to meet building codes
- Manufactured 36" wide to any variety of lengths up to 144"
- Custom size available
- Can be designed to accommodate even old, out dated metal roof designs.

Shown:

**10' Retro Fit Metal Roof flashing with 12" Curb
and 30" x 60" Skylight opening**

1.) Remove old fiberglass lighting panel and clear away any debris and screws that may be surrounding the edges of the opening.

2.) Place the Retro Fit Roof Flashing over the opening, making sure that it sets properly. Secure with screws all the way around the flashing.

3.) Apply the flute fill and fasten down the insulated board on the metal roof and apply insulation to the sides of the flashing.

4.) When applying the roof covering, bring it over the top portion of the flashing and secure it down.

5.) Cover the top portion of the flashing, secure and trim away any excess roof covering.

6.) Install the skylight over the finished insulated curb and secure.

The Retro Fit Metal Roof Skylight Flashing can be manufactured to accommodate tall rib roofs to the short ribs.
